

HANDS-ON PRACTICE

CSC Presents Something New!

Most EMS Training Officers recognize that practicing skills once every three to five years, in an EMT Renewal Class, is just not enough! You would probably like to see your First Responders and EMTs get more practice. Therefore, CSC has come up with two new practice sessions for your members.

REMEMBER PRACTICE MAKES PERFECT

EMT Skills Practice with Scenarios

This course will give students a medical or trauma scenario. Then give them the opportunity to assess and treat a patient with equipment off their ambulance. (2 hour minimum)

Just Plain Skills

Practice is given on the core skills listed below. You can pick one subject per hour. (2 hour minimum)

<i>Medical Assessment</i>	<u>Price</u>	<i>Airway Adjuncts</i>
<i>Trauma Assessment</i>	2 hours- \$200	<i>HARE Traction</i>
<i>Vital Signs</i>	3 hours- \$275	<i>K.E.D</i>
<i>Oxygen Therapy</i>		<i>Bandaging</i>
<i>Lung Auscultation</i>		<i>Splinting</i>
<i>Emergency Childbirth</i>		

These are core practice skills and have no CEUs awarded for them. However, they may give some peace of mind to new and experienced EMTs alike.
