ABOUT CSC

CSC is celebrating 30 years in the life saving education business. Providing you with the best instructors and state of the art equipment to practice with.

Classes are taught with a multimedia approach in a relaxed atmosphere.

Group discounts are available for 11 or more students.

Attention Nurses and Nursing Students!

The competition for good nursing jobs is fierce in today's Health Care Community, especially if you want to specialize in critical care.

Let CSC help you attain the nursing position you want by furthering your education.

The courses contained in this brochure will help bolster your resume and assist you in achieving your goals.

IV Therapy (\$250)

This 8 hour course will give the student classroom and practical knowledge necessary to start intravenous therapy on patients. Certificates of completion will be given on successful completion.

Course includes:

- ID / location of veins
- Demo—proper procedure for IV
- Stabilization of IV cath and tubing
- Complications of IV therapy
- Documentation
- Proper housekeeping—PPE

EKG Interpretation (\$150)

This 8 hour course is recommended for anyone who has to read and interpret EKGs. Identification of atrial, ventricular, and life threatening rhythms will be practiced

This class should be taken prior to ACLS or PALS for those who cannot read EKGs.

Course includes information on:

- Heart anatomy
- Electrical conduction system
- The normal EKG
- Recognition of basic arrhythmias

CPR Healthcare Provider Renewal (4 hours \$55)

This American Heart Association course will refresh and update you on the latest CPR skills. This class is a MUST for all Healthcare Providers.

Advanced Cardiac Life Support (16 hours \$200)

This American Heart Association course is designed to teach you the life saving skills required to be both a team member and leader in either an in hospital or out of hospital setting. Prerequisites for this class are a knowledge of ECG interpretation and certification in AHA Healthcare Provider CPR.

Renewal Courses Available

Pediatric Advanced Life Support (16 hours \$200)

This American Heart Association course is recommended for doctors, nurses, and paramedics who are required to treat children who are critically ill. Practice as both team member and leader will be done. A knowledge of ECG interpretation and HCP CPR certification are needed prior to taking this course

Renewal Courses Available
